Zoho HRMS Workflow-Change Request Form

Click on Request Form - > on Add Record

The screenshot shows a web application interface for managing request forms. The top navigation bar includes tabs for 'Resignation Form', 'Probation', 'EPF_Nomination Form 2', 'Payment of Gratuity Form F', 'Request Form' (which is selected), and 'Clearance'. Below the navigation bar, there is a sidebar on the left with icons for 'Home', 'Leave Tracker', 'Performance', 'Files', 'Compensat...', and 'General'. The main content area displays a table with columns: 'Status', 'Approver', 'Approval Time', 'Requestor Employee ID', 'Request Date', 'Updated Designation', 'File -(If you want to share any)', 'Updated Reporting Manager', and 'Updated Functi'. The table is currently empty, and a message 'No records found' is displayed in the center. The 'Add Record' button is located in the top right corner of the table area, highlighted by a red box.

The form will open, and here you can view the details. You need to select your functional manager, as he/she is responsible for approval. You also need to select the data that needs to be updated from the dropdown (such as **Designation, Reporting Manager, Department, or Functional Manager**).
